JOB POSTING

The Anguilla Electricity Company Limited invites applications from suitably qualified candidates to fill the position of Mechanic in the Generation Department.

Main duties & responsibilities of the position are as follows:

- Conduct visual inspections, checks and tests on engines, log required parameters and report any discrepancies to supervisor
- Conduct major engine overhauls for each engine or as otherwise dictated by maintenance requirements.
- Conduct diagnostic tests on engines and components to determine causes of operational malfunction and recommend corrective measures.
- Carry out the removal, repair, replacement, and overhaul of engine components and auxiliary equipment in accordance with existing standards, specifications, and procedures.
- Troubleshoot and rectify faults on the units and auxiliary equipment in accordance with approved standards, specifications, and procedures.
- Perform other related duties as required by the job function.

Qualifications:

The candidate should be highly motivated, disciplined and have at least two year's experience in turbocharged diesel engine troubleshooting and maintenance. Candidates with a technical certificate in mechanical engineering (or an equivalent accreditation) will be preferred.

Candidates should address their applications to

The Human Resources Officer
Anguilla Electricity Company Limited
P.O. Box 400
The Valley
Anguilla

The deadline for application is August 28th 2009.
